### Historija

#### #1 - 20.02.2008 12:51 - Ernad Husremović

jedan od problema sporosti koji sam uočio jeste i usporenje dev-infra-2 sesije koja je ujedno i http proxy - na njega idu svi unutrašnji i vanjski request-i danas sam promjenio taj proxy i stavio da saobraćaj 80 ide na pound balancer, a dio tog saobraćaja ide na apache2 web server

#### #2 - 20.02.2008 12:52 - Ernad Husremović

evo kako izgleda pound.cfg (za sada)

```
root@dev-infra-2:/var/lib/rails/typo/hernad# cat /etc/pound/pound.cfg
```

```
#####  
## global options:  
  
User      "www-data"  
Group     "www-data"  
#RootJail "/chroot/pound"  
  
## Logging: (goes to syslog by default)  
##      0      no logging  
##      1      normal  
##      2      extended  
##      3      Apache-style (common log format)  
[[SaScInfraLogLevel]]      1  
  
## check backend every X secs:  
Alive     30  
  
## use hardware-acceleration card supported by openssl(1):  
#SSLEngine "<hw>"  
  
#####  
## listen, redirect and ... to:  
  
## redirect all requests on port 8080 ("ListenHTTP") to the local webserver (see "Service" below):  
[[SaScInfraListenHTTP]]  
    Address 0.0.0.0  
    Port    80  
  
## allow PUT and DELETE also (by default only GET, POST and HEAD)?:  
xHTTP     1  
  
Service  
    [[SaScInfraHeadRequire]] "Host:.*zimbra.sigma-com.net.*"  
    [[SaScInfraBackEnd]]  
        Address zimbra-1.sigma-com.net  
        Port    80  
    End  
    Session
```

```
        Type    BASIC
        TTL     300
    End
End
```

```
Service
  [[SaScInfraHeadRequire]] "Host:.*forums.bring.out.ba.*"
  [[SaScInfraBackEnd]]
    Address 127.0.0.1
    Port    6001
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
Service
  [[SaScInfraHeadRequire]] "Host:.*www.bring.out.ba.*"
  [[SaScInfraBackEnd]]
    Address 127.0.0.1
    Port    7001
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
Service
  [[SaScInfraHeadRequire]] "Host:.*hernad.bring.out.ba.*"
  [[SaScInfraBackEnd]]
    Address 127.0.0.1
    Port    8001
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
Service
  [[SaScInfraHeadRequire]] "Host:.*.bring.out.ba.*"
  [[SaScInfraBackEnd]]
    Address 127.0.0.1
    Port    7001
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
Service
  [[SaScInfraHeadRequire]] "Host:.*.openoffice.ba.*"
  [[SaScInfraBackEnd]]
    Address 127.0.0.1
    Port    7001
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
Service
  URL ".*.mov"
  [[SaScInfraBackEnd]]
    Address 69.12.146.109
    Port    8081
  End
  Session
    Type    BASIC
    TTL     300
  End
End
```

```
End
```

```
Service
```

```
  [[SaScInfraBackEnd]]
```

```
    Address 127.0.0.1
```

```
    Port    8080
```

```
End
```

```
End
```

End

vidimo da zimbra.sigma-com.net ide direktno sa pound-a na zimbra-1 server

utisak mi je da je sada odziv bolji

**#3 - 20.02.2008 12:54 - Ernad Husremović**

baš me interesuje da li će doći do promjena kod vanjskog pristup-a zimbri

**#4 - 20.02.2008 14:25 - Jasmin Beganović**

meni je osjećaj da je usporilo pogotovo ticketi

**#5 - 20.02.2008 14:27 - Saša Vranić**

da isto tako

**#6 - 20.02.2008 14:42 - Ernad Husremović**

ticketi su sporiji,

a zimbra ?

**#7 - 20.02.2008 14:49 - Jasmin Beganović**

nisam primjetio ubrzanje vjerovatno što je kod nas na ovim slabijim laptopima sama po sebi zimbra spora

**#8 - 20.02.2008 14:49 - Saša Vranić**

ma da kod zimbri je to već mudrost

**#9 - 20.02.2008 14:53 - Ernad Husremović**

mogući problem trac-a je ovo stalno pozivanje google-a

```
root@dev-infra-2:/usr/share# grep -r "google" * | grep analy
```

```
trac/templates/footer.cs:<script src="http://www.google-analytics.com/urchin.js" type="text/javascript">
```

```
root@dev-infra-2:/usr/share# vi trac/templates/footer.cs
```

**#10 - 20.02.2008 14:53 - Ernad Husremović**

ovo sam ukinuo sada

**#11 - 20.02.2008 15:06 - Jasmin Beganović**

sad je trac ok

**#12 - 29.02.2008 09:51 - Ernad Husremović**

subversion radi kada sam stavio u /etc/pound.cfg

```
xHTTP 3
```

u pound manual-u piše

```
xHTTP value
```

```
  Defines which HTTP verbs are accepted. The possible values are:
```

```
  1 (default) accept only standard HTTP requests (GET, POST, HEAD).
```

```
  2 additionally allow extended HTTP requests (PUT, DELETE).
```

```
  3 additionally allow standard [[SaScInfraWebDAV]] verbs (LOCK, UNLOCK, PROPFIND, PROPPATCH, SEARCH, MK
```

COL, MOVE, COPY, OPTIONS, TRACE, MKACTION, CHECKOUT, MERGE, REPORT).

4 additionally allow MS extensions [[SaScInfraWebDAV]] verbs (SUBSCRIBE, BPROPPATCH, POLL, BMOVE, BCOPY, BDELETE, CONNECT).

5 additionally allow MS RPC extensions verbs (RPC\_IN\_DATA, RPC\_OUT\_DATA).

**#13 - 06.04.2008 13:02 - Ernad Husremović**

- Status promijenjeno iz Novo u Zatvoreno

**#14 - 28.05.2008 20:11 - Ernad Husremović**

- Kategorija postavljeno na pound
