<b>Ciljna verzija:</b>			
<b>Opis</b>			
Then there's the ZimbraME client. The Zimbra J2ME application is a program that you run on your ordinary cell phone that provides an over-the-air gateway into your Zimbra server. Whether you're running Samsung, BlackBerry, or just have a razor phone, you can access your data right on your phone...for free! ZimbraME is Open Source, so you can grab and compile the source from our Public P4 Cache and make it work with the device of your choice. Be sure to read the ReadME file for compilation instructions.			

### Historija

#### #1 - 04.04.2008 08:02 - Ernad Husremović

Supported Devices

In addition to a generic J2ME application for most phones, Zimbra Mobile Edition is also available in versions optimized for the following brands and models:

- BlackBerry (8800, 8300, 8100)
- Motorola (KRZR, RAZR, RAZR 2, RIZR, ROKR)
- Nokia (E61, N73, N80, N95)
- Samsung (SGH-E900)
- Sony-Ericsson (K800i, M600, W950i)

- Status promijenjeno iz *Novo* u *Dodijeljeno*

- *Odgovorna osoba* promijenjeno iz *Ernad Husremović* u *Jasmin Beganović*

- *Prioritet* promijenjeno iz *Normalan* u *Nizak*

baš me interesuje na šta to liči na recimo jasko ramaglas nokiji, to treba probati po uspostavljanju zimbrea u rg-u

**#4 - 04.04.2008 12:14 - Jasmin Beganović**

da to bi bilo baš interesantno

**#5 - 18.11.2008 12:28 - Jasmin Beganović**

- Status promijenjeno iz Dodijeljeno u Odbačeno

out of date

**Fajlovi**
