[android scripting environment](#)

The Android Scripting Environment (ASE) brings scripting languages to Android by allowing you to edit and execute scripts and interactive interpreters directly on the Android device. These scripts have access to many of the APIs available to full-fledged Android applications, but with a greatly simplified interface that makes it easy to:

- Handle intents
- Start activities
- Make phone calls
- Send text messages
- Scan bar codes
- Poll location and sensor data
- Use text-to-speech
- And more
