<http://in.relation.to/Bloggers/IntroducingMetawidgetABetterWayToBuildYourUI>

Metawidget is a UI technology focused on enabling you to use your existing back-end technologies (including combinations of technologies) and your existing front-end frameworks (including different UI frameworks and mixing third-party widget libraries) to automate UI generation. It only tries to generate the forms, not your entire UI, so you still use your preferred UI toolkit to get the exact look and feel your users require. And it generates everything at runtime, not statically, so your screens automatically evolve in sync with your business objects.

#4 - 04.06.2010 19:08 - Ernad Husremović

- Fajl *metawidget-0.95.zip* dodano

#5 - 04.06.2010 19:12 - Ernad Husremović

- Fajl *metawidget.pdf* dodano

unutar zip-a ima ovaj pdf koji sadrži dokumentaciju - objašnjenje primjera adress book-a, pored ostalih stvari

#6 - 26.11.2010 18:53 - Ernad Husremović

- Status promijenjeno iz *Dodijeljeno* u *Zatvoreno*
