Historija

#1 - 28.03.2012 08:59 - Ernad Husremović

sinoć sam napravio merge semaphires_v1.1 u glavni branch.

međutim, postoje neodložne stvari za danas tako da se mora uraditi par hitnih debug-a.

Vraćam se zato na verziju 0.9.74 koja je posljednja objavljena tako da debug developer može uraditi te ispravke na starom stanju core-a

```
vagrant@f18-dev-1:~/github/F18_knowhow$ git checkout 0.9.74
Note: checking out '0.9.74'.
```

You are in 'detached HEAD' state. You can look around, make experimental changes and commit them, and you can discard any commits you make in this state without impacting any branches by performing another checkout.

If you want to create a new branch to retain commits you create, you may do so (now or later) by using `-b` with the checkout command again. Example:

```
git checkout -b new_branch_name
```

```
HEAD is now at e4066b8... f18 release 0.9.74
vagrant@f18-dev-1:~/github/F18_knowhow$ git checkout semaphores_v1.0
error: pathspec 'semaphores_v1.0' did not match any file(s) known to git.
vagrant@f18-dev-1:~/github/F18_knowhow$ git branch semaphores_v1.0
vagrant@f18-dev-1:~/github/F18_knowhow$ git push origin semaphores_v1.0

provjera i napomena za developera

paziti da si na pravom branchu kada radiš

npr. `fin/fin_semaphores.prg` u `semaphores_v1.1` ne postoji

#4 - 28.03.2012 09:08 - Saša Vranić

odradio

```
git checkout semaphores_v1.0
```

i swičao se na ovaj branč, evo vidim da imam fajl `fin_semaphores.prg` sada

#5 - 28.03.2012 09:13 - Ernad Husremović

pushiranje na server:
