#2 - 13.04.2012 14:38 - Ernad Husremović

taj zadnji dio skripte je nebitan.

bitno je da se napravi F18 exe

#3 - 13.04.2012 14:39 - Ernad Husremović

gore vidim errore kod build-a to je već problem

#4 - 13.04.2012 14:43 - Ernad Husremović

jesi li dobio F18.exe

taj dio pakovanja radi samo na mac-u ali ono najbitnije build bi trebao biti ok

#5 - 13.04.2012 15:09 - Saša Vranić

ne, ne dobijem, gcc izbacila identičnu grešku

hm, ja na sesiji nisam instalirao zadnju verziju f18_serviser sa mingw itd... možda je to uzrok ?

#6 - 13.04.2012 15:18 - Ernad Husremović

radi li ti build.sh obični ?

#7 - 13.04.2012 15:34 - Saša Vranić

da

#8 - 13.04.2012 15:38 - Ernad Husremović

u build.sh je podešen working dir .h

to je razlog ... saću staviti execut pa neka ga željka instalira drito sa ticketa

#9 - 13.04.2012 15:49 - Ernad Husremović
